ADVISORS

Managed Security Services Overview

Managed Security Services

Security Solutions

Third party/ outsourced companies offering cloud, endpoint, network and data security services

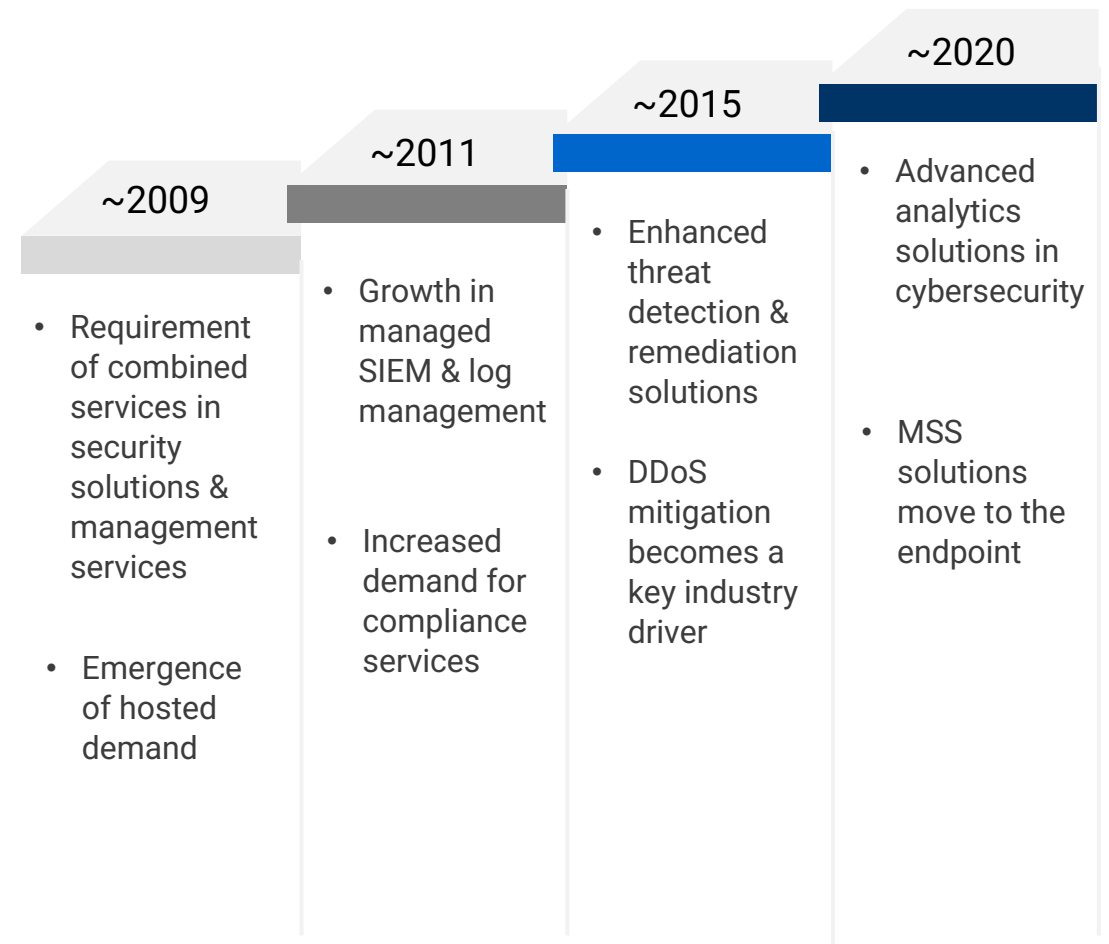

Monitoring & Incident Response

Round-the-clock surveillance for threat response and proactive risk intelligence. Skillful management of breaches to minimize fallout and prevent data compromise

Threat Intelligence & Vulnerability Management

Insights into emerging threats and vulnerabilities for proactive defense. Identifying and addressing system weaknesses before exploitation

Evolution of MSS

Key Segments of MSSPs

Key Growth Driver – Increase in Cybercrime

Global Data Breaches by Industry, 2022

Global Data Breaches by Patterns, 2022

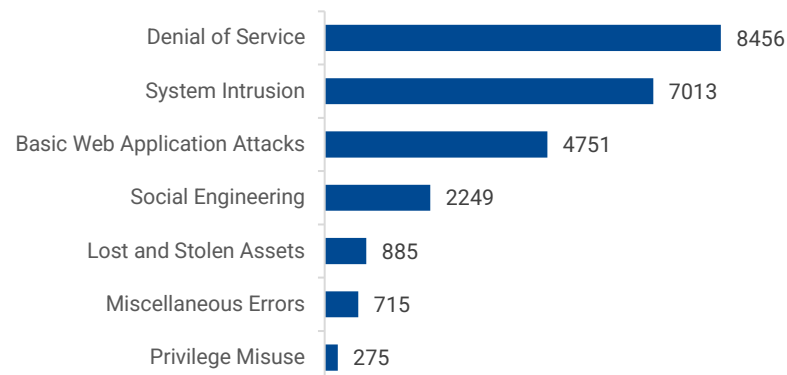

- In FY22, 23,896 data incidents occurred with 5,212 breaches
- ~422 Mn individuals' data was compromised
- Twitter experienced the most significant impact, with approximately 221 Mn users' data breach

Global Data Incidents by Industry, 2022

MSSP – Key Trends

Rapid shift of organizations to cloud leading to high demand of cloud security services

- Approx. 94% of organizations have moved their data to the cloud
- As cloud environments become more complex, managing infrastructure, scale, and security becomes increasingly challenging for organizations

Source: McAfee

Heightened focus on software and data security due to major breaches

- Focused on activities like Managed Detection & Response (MDR) is a tech-human approach for real-time threat detection & response

Source: Ponemon Institute

IOT's rising presence in workplaces driving MSSPs to offer specialized services

- MSSPs offer IOT specific security services including: device management, vulnerability assessment, threat detection, safeguarding IoT

Source: Mordor Intelligence

AI & ML are revolutionizing MSSP, creating new ways to provide security services

- AI & ML enhance threat detection by spotting patterns in large data, enabling quicker, precise security threat identification
- AI & ML-enabled cybersecurity responds 50% faster to threats than non-adopters

Source: IBM

Zero trust security's continuous monitoring and validation needs providing MSSPs a unique opportunity to assist customers

- The Zero Trust Security model access is only granted after authentication and access is continuously monitored
- 70% of organizations see zero trust security as a high or critical priority for their cybersecurity strategies

Source: Survey by IDG

Key MSSP Companies: Last 12m Equity Market Performance

Note 1: The MSSP Index has been calculated as market cap weighted average of 14 companies

Note 2: Stock prices are as on 23rd Sept 2023

Notes

1. Based on Broker estimates and latest available balance sheet data
2. For EBITDA, EBIT and Net Margin all values smaller than zero or above 90, 120 and 150 respectively are indicated as "N.M."
3. Enterprise value = market cap + gross debt + gross cash + preferred stock + minority interest; cash includes long-term marketable securities

Slowdown in M&A Deal Values – Expected to Pickup in 2H 2023

Global Cyber Security M&A Deal Value (\$ Bn)

Source: Momentum Cyber

- Global cybersecurity M&A market faced a slowdown in FY22 which further continued in FY23 potentially attributable to current challenging macroeconomic environment and high interest rates
- We estimate an uptick in the market in the 2nd half of 2023 primarily due to availability of dry powder with PE funds and strategic buyers

Key Trends Shaping MSSP M&A Deals in the Last 12-24 Months

Emergence of Private Equity Led Roll-up Deals

- Emerging trend of roll-up deals where multiple small companies are merged with a holding company to form a larger Co.
- Example: Roll-up Deal of 15 companies in one platform to create largest MSP business
 - Alfair capital and Walter Capital Partners have acquired MSP Corp., a Canadian managed service provider group, in a transaction worth more than \$100 million. After the acquisition, MSP Corp will merge with Groupe Access, a managed service provider of technology and cybersecurity solutions. Prior to these deals, both companies acquired a number of smaller MSPs

3-4 companies merging together to create large Managed service providers

- Trend of multiple specialist IT managed services firms merging to create a larger firm with expanded offerings
- Example: Merger to create IT Managed Services platform, Procure IT
 - Procure IT, was formed through the merger of four technology advisory firms - Premiere Worldwide, Krewe Advisory Group, Mercury Communication Services and Premier Technology Advisors. The newly formed company will provide a platform for IT sourcing and spend, performance, and risk management

Key Trends Shaping MSSP M&A Deals in the Last 12-24 Months

Presence of Financial Sponsors looking for Platform Acquisition Opportunities

- Multiple financial sponsors and private equity funds exploring “platform” opportunities – i.e. acquiring an MSP company as their initial investment using which they will acquire more companies over time to create a niche platform play
- ~70 PE funds have already made an initial investment in an MSP company in which they are looking for add-on investments
- Key drivers of PE interest in the space include – fragmented market providing consolidation opportunities and high demand of consolidated solution offerings from end-users creating demand for full-service cybersecurity firms rather than specialized niches

Increasing Deal ticket sizes

- Average deal size has increased as larger PE funds are getting more involved in the MSSP space
- Larger fund houses (with average \$1.5Bn+ fund sizes) are now looking at platform investments in MSSP space compared to smaller funds (~\$500m average size) a couple of years ago
